That defeats the purpose of having a time stamped version that shows it was before I started data collection? I'm confused why these are hidden?

I think there was some confusion, You need to reupload it, it was in the email from Feb 28. We just provided it to you, we are not able to upload content in your name. Sorry about the confusion.

Hi Blaine - I still can't see that preprint - this is for a registered report at NHB I'm finalizing, which would like to be able to link directly to version 6.

Not yet - just that one is our Stage 1, so we are linking it to the final manuscript stage 2 report for publication.

Hi Erin,

Your replies must have gotten lost in our spam folder, we utilize gmail for our organization that then forwards the emails to our support center, I'm very sorry we missed those emails, Yes we can get version 6 of that preprint. Are there any other preprints or versions you need? I will send that to you by the end of the day. Once again, very sorry for missing those emails.

Blaine

Hi guys I've replied a few times – any updates here?

Thanks!

Looks like I'm referring to version 6 in my registration:

Please see registered report stage 1 at <https://osf.io/q4fjy> (version 6, 5/31/2022).

Can we rescue that one?

erin

Hi,

It was noticed that after a release of an improved feature on the OSF allowing for versioned DOIs for preprints, that that previous preprint versions were removed, which was an unexpected result. These versions are not lost, just merely hidden. Which version do you need restored? I can have one of our engineers retrieve it for you. Sorry for any inconvenience. Don't

hesitate to reach out in the future with additional questions or feedback.

I am trying to link to a specific version of a preprint, since it was noted in our preregistration.

I can see that it has multiple versions, and we used to be able to view them in the dropdown below the manuscript. Now, there's a nice version option on the side - but I only get one version (the last one). Can you help with the situation please?

Thanks,

erin
