IRB File No. 20211110

Erin,

The review of your protocol titled "Semantic Priming Across Many Languages (SPAML)" is now complete. The project has been approved for a one-year period as an exempt study.

This approval may be extended after one year upon request. Please be advised that if the project is not renewed, approval will expire and no more research involving humans may take place.

Please note that HU-IRB approval policies require that you adhere strictly to the protocol as last reviewed by the IRB and that any modifications must be approved by the IRB before they can be implemented. Adverse or unexpected events must be reported to the IRB as soon as possible with an indication from the Principal Investigator as to how, in the view of the Principal Investigator, these events affect the continuation of the protocol.

Finally, it is the responsibility of the Principal Investigator to ensure that any required ethical guidelines and approvals of any outside facilities or institutions are obtained and filed with the IRB prior to the initiation of any research.

Please quote your IRB file number 20211110 on future correspondence.

If you require a formal letter from the IRB that your project is approved, please request it by email through IRB@HarrisburgU.edu.

Congratulations and best of luck in conducting your research.

Regards,

Glenn

Glenn Mitchell, MD, MPH
